Student Support Programs and Offices

Tutoring and study, communication, and quantitative skills development are supported through the Writing_Center, Tutoring_and_Study_Center, Math_Clinics, and other academic support services offered through individual colleges. Housed in the main library, the newly named Center for Learning and Student Success has a goal of serving as a central site for academic support services. The Educational Center for Student_Athlete_Development provides targeted support for student athletes, and the Office_of_Disability_Services provides academic adjustments and support services aimed at minimizing barriers. Learning_communitites offer students in- and out-of-classroom experiences with an academic focus to bring together those who share similar interests and goals.

To further support student success, health, and well-being, the Counseling Center (Counseling Center Site) provides comprehensive/holistic mental health, substance abuse, and sexual assault/relationship violence related services. The Office of Student_Assistance helps students achieve academic success and personal growth by providing direct support and connection to appropriate University resources to help manage any aspects of their well-being. Student Support Services collaborates with other campus entities to support academic, financial, career, personal, and transitional growth and development. They oversee the SummerStart program, which provides a transitional experience designed to better prepare students for the rigors of college-level studies.

Career Services offers workshops, internships, and job search support to facilitate students' preparation for, and successful transition into, the workplace after graduation. Individual school and college career centers and academic advisors also enhance this network of support with profession-specific assistance and preparation for licensing/certification exams (Certification_help). The Shaw_Center for Public and Community Service promotes ethical, professional, and personal development through reciprocal learning experiences in partnership with the larger community. SU Abroad offers semester and summer study and internship opportunities on six continents as well as Los Angeles, Washington D.C., and New York City, with programs available for students in all colleges (SU_Abroad_academic_specialties).

We support computing resources through Information Technology Services, which provides support services, computing services, educational technologies, a Maker Space for creating with technology, and a new Digital Scholarship Space to support research. Many colleges maintain specialized state-of-the-art lab facilities (Centers_and_Labs_at_colleges_examples), including the Dick Clark Studios and the Falk College Complex Kitchens.

Information literacy skills are supported through Syracuse University Libraries, which provides collections, access services, information literacy instruction, and support for research and publishing. The Blackstone Launchpad inside Bird Library supports interdisciplinary student entrepreneurship across campus. Other departmental campus libraries provide support in law and African American studies.
